HELEN COLON

Junior Developer

dev.helenvcolon@gmail.com ✉ | (845) 597-7829 ▢ | Campbell Hall, NY 10916 🏠

Objective

To leverage my skills in front-end and back-end web development to contribute effectively to dynamic projects. Eager to collaborate with innovative teams where I can apply my proficiency in HTML, CSS, JavaScript, React, Node.js, Express, and databases to create impactful digital solutions and advance my career in software development.

Skills

Frontend Development: HTML5, CSS3, JavaScript, jQuery, and React.js

Backend Development: Node.js, Express.js, GraphQL, MySQL, and MongoDB (MERN stack), NoSQL

Additional Technologies: GitHub (version control), Postman (API testing), MySQL Workbench, MongoDB Compass, GraphQL Sandbox, API Design, Rest, JSON, and currently learning AWS Lambda and serverless architectures.

Design Tools: Adobe Photoshop, Gimp, Figma, and Canva

Projects

React Portfolio: Personal portfolio website showcasing web development projects and skills. **View Portfolio**

Weather Dashboard: Dynamic web application using JavaScript and OpenWeather API for real-time weather updates. **View Project**

Timed Quiz Application: An interactive JavaScript quiz application with timed questions and score tracking. **View Project**

Pregnancy Journal: Full-stack MERN application with authentication for expecting mothers, featuring a daily journal, kick counts, and image uploads. **View Project**

Social Network Blog: NoSQL social networking blog API project using Node.js, Express, and MongoDB. **Watch Demo**

GitHub Portfolio: For a comprehensive view of my other projects and contributions, visit my **GitHub Portfolio**

Education

Full-Stack Web Development Coding Bootcamp Certificate Program, University of Pennsylvania (UPenn) **View Certificate and Curriculum Description**

Bachelor of Science in Business Education, Baruch College, New York
